Maruti- Suzuki MyNEXA Loyalty Program - Standard Operating Procedure

Introduction

MyNEXA is a customer loyalty program introduced by Maruti-Suzuki. This program is designed to provide array of benefits to customers who became member of MyNEXA program. Membership benefits are awarded to members in terms of points where 1 point equals to 75 paisa. The enrollment fee for membership program is INR 1000. MyNEXA Card is dispatched to the member within 4 to 5 weeks after the enrollment.

Any person who desires to become a member of MyNEXA shall be required to fill an Application Form and submit documents described therein. In case of furnishing false, untrue, or incomplete information, or non-submission of any document, Maruti Suzuki India Ltd reserves the right to accept or reject the Application and their decision with regard to such acceptance or rejection shall be final and binding and non-contestable.

Member can avail Maruti-Suzuki MyNEXA points on below mentioned services of Maruti Suzuki.

- I. Insurance
- II. Insurance Renewal
- III. Extension of Warranty
- IV. NGA (Nexa Genuine Accessories) Purchase
- V. Car Services
- VI. Repair

Procedure of Point Allotment to members

Once MyNEXA Card is obtained post purchase of car (which is dispatched in around 4 to 5 weeks of enrollment), any transaction done by customer in form of buying accessories, servicing, insurance and even repair. Customer can also redeem loyalty points while exchanging old Maruti-Suzuki/Nexa car with new car. Below are key take away from the benefits provided to Maruti Suzuki My Nexa Card holder.

- ✓ Member gets 200 MyNEXA points as joining bonus.
- ✓ Member gets 7 point for every INR 150 spend at the Maruti Suzuki & Nexa network.
- ✓ Member gets 1400 points on every successful referral resulting into sale at Maruti Suzuki & Nexa network.
- ✓ Member gets exchange benefit of 8000 MyNEXA points on exchanging an old Nexa vehicle with new one.
- ✓ Every single point worth 75 paisa in monetary terms.

Note: It's important to get your Nexa Card Swiped before leaving dealer workshop or showroom so as to get points accumulated in it.

Cost

My Nexa Loyalty membership costs INR 1000/-+ GST.

Enrollment Process

Enrollment of membership in the DMS application is mandatory in order to render loyalty program benefits to Loyalty program members. In MyNEXA enrollment process member's application goes through several procedures where customer's application is validated against Vehicle Ownership Documents, Member basic details like name, residential address, mobile no., signature etc., VIN (Vehicle Identification Number) and Chassis Number.

When Enrollment can be done:

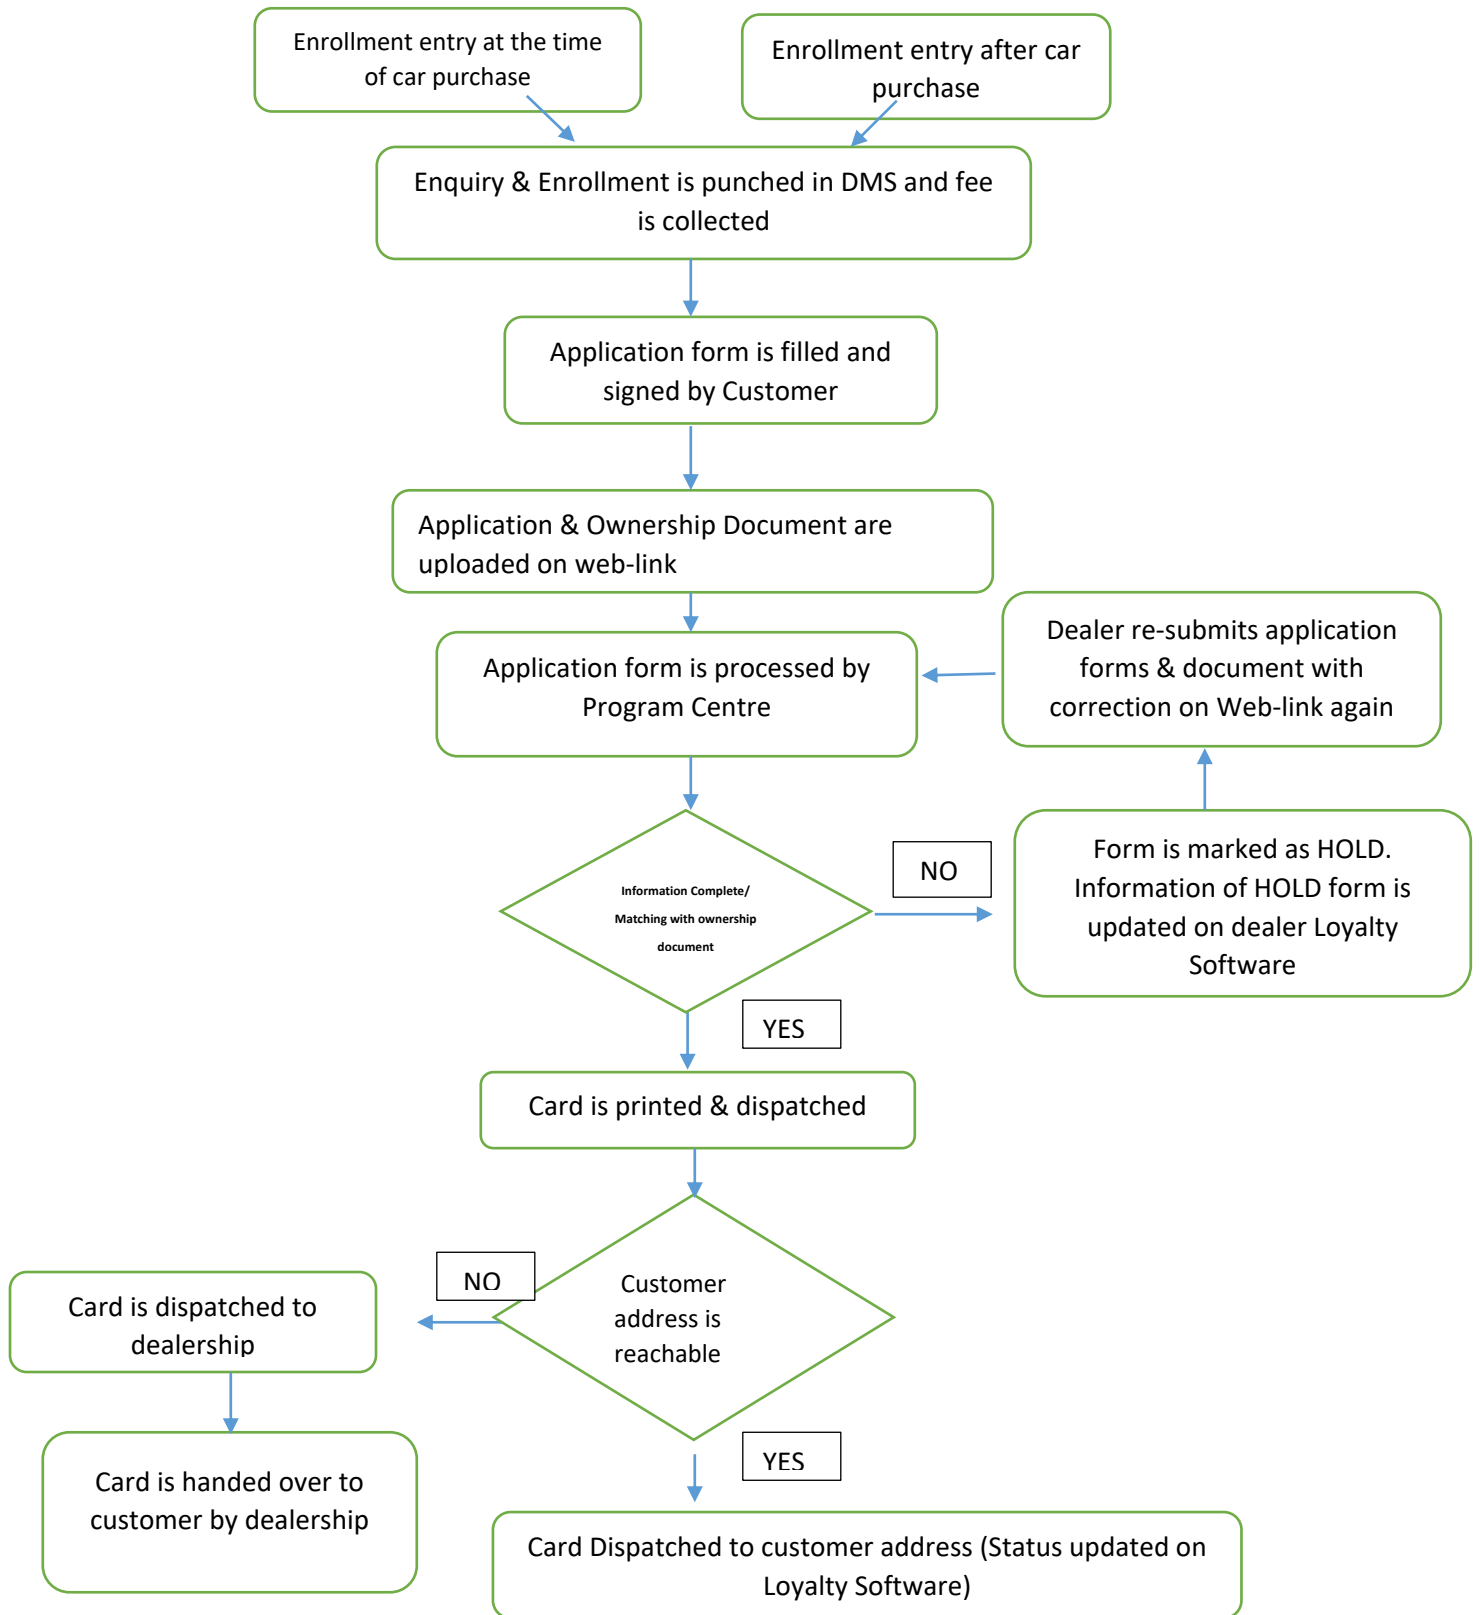

Enrollment in MyNEXA Customer Loyalty program can be done at both at the time of car purchase or post car purchase.

How Enrollment is done:

Below is the basic workflow of MyNEXA enrollment process.

- Any Customer who requires MyNEXA Loyalty Card can visit nearest Maruti Suzuki Nexa Showroom or any other authorized Maruti Suzuki outlet.
- Enquiry & Enrollment is punched in DMS and fee is collected from the customer.
- Dealer will provide application form and customer need to fill it.
- Once application is filled, Application & Ownership Document are uploaded on web-link by dealer.
- Once Application form and required supporting document are uploaded on the web-link, the application form is processed by Program Centre.
- Program center checks whether application is complete or not and matches with supporting ownership documents provided like Vehicle ownership documents (Vehicle Invoice) and VIN (Vehicle Identification Number).
- If information provided in the application form is complete and matches with the ownership document provided, MyNEXA card is send for printing process and dispatches to respective member within 4 to 5 weeks of time from enrollment.
- If information in Application form is not complete then the enrollment is marked as HOLD.
- Information of HOLD form is updated on dealer Loyalty Software.
- Dealer re-submits application forms & document with correction on Web-link. Program center rechecks the correctness of information and card is printed & dispatched to the respective member.
- In case the customers address is not reachable, card is dispatched to the dealership and dealer hand it over to the respective customer.
- Once the card is dispatched to the customer, status is updated in the loyalty software.

Enrollment Process Work Flow

Mandatory Fields for card activation & Chassis Validation

Mandatory fields required

- Name
- Residential Address
- City
- Mobile No.
- VIN No.
- Car Ownership proof
- Signature of Member

VIN Validation

- System validates uniqueness of vehicle on the basis of VIN No.
- System pops up the warning for duplicate VIN and system does not allow to enter duplicate VIN.
- Such cases are marked in system separately for reference.

Accepted Vehicle Ownership Documents & Fields for double entry

Accepted Vehicle Ownership Documents

Below is the list of document that can be provided as supporting as Vehicle Ownership Document.

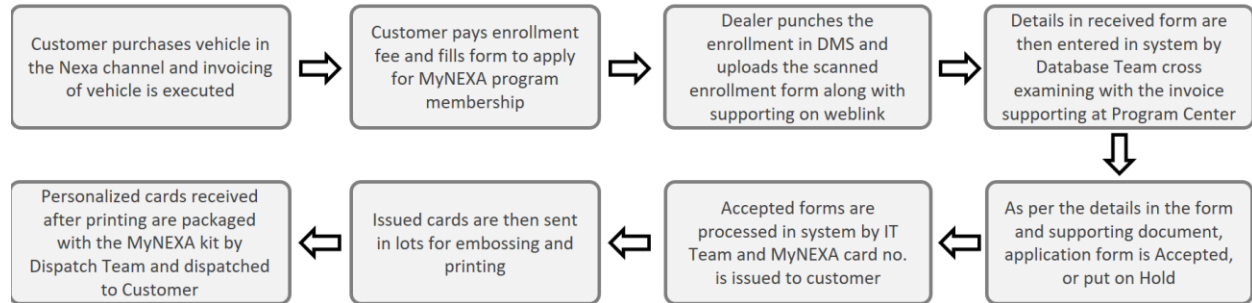

- Retail Invoice of the Vehicle
- Copy of Insurance
- Registration Certificate

Fields for double entry

- 8000 exchange points

Avenues of points earning

- NEXA Car service
- Insurance
- Nexa Genuine Accessories purchase
- Repair
- Extended Warranty

Points earning process at dealerships

Transaction validation

Card validation

- Mandatory swiping of physical MyNEXA Card in application to populate card number in designated field.
- Card number gets validated from centralized server for transaction processing.
- In case of invalid card number, system will not allow any transaction & gives an error message.

Chassis validation

- MyNEXA executive needs to enter the model & VIN number.
- System checks the combination of model & VIN on centralized server. If valid, then system will allow the transaction.
- In case additional VIN is to be added then a formal request has to be sent to program center with proper documentation.

Duplicity Check

- Duplicity check has been implemented on following fields:
 - Dealer Code
 - Transaction Type
 - MyNEXA Card Number

- Invoice Number & Amount
- VIN
- If all above fields gets matched, then system will reject the transaction and a message is populated on the dealer's interface.

Limitations on Transaction count & amount

The validation on limitation of transaction count and amount is done directly through DMS at the time of point allocation and redemption respectively.

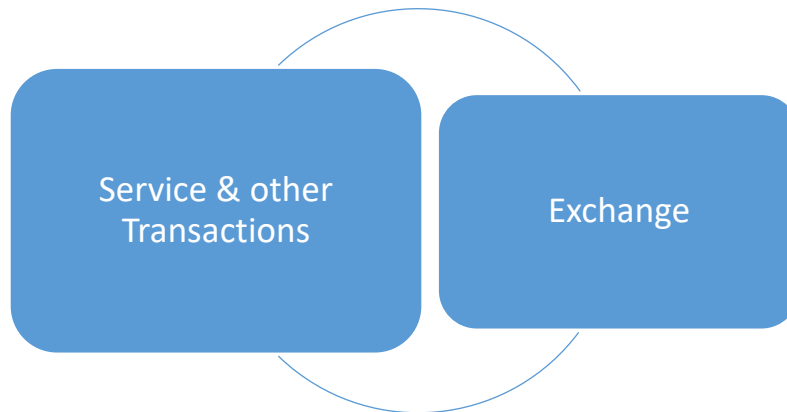

Backend transaction processing

- Requests are taken only over Emails
- Requirement
 - Scan of Invoice
 - Transaction details in a pre-defined format
 - MSIL or dealer consent is required if backend transaction requested from customer.
 - MSIL approval is required if transaction is validated as per document but not validated by DMS.
 - MSIL or Dealer consent is required if backend transaction is requested from customer.
- Backend transaction will be executed only for below cases.
 - If transaction is older than 1 month.
 - If software at dealers end is not working.
 - If problem in MyNEXA card while swapping at dealer's end.

Points redemption

Types of redemption

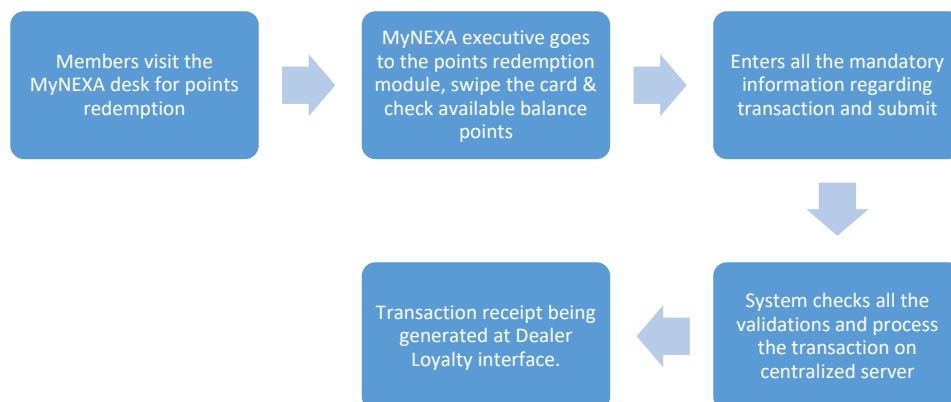

Points earned through the MyNEXA program can be redeemed against any of below:

Redemption on Service & other Transactions

- Redemption of points can be claimed against the below transaction types:
 - Car service
 - Insurance & its renewal
 - Nexa genuine accessories purchase
 - Extended Warranty

Redemption on Service & other Transactions process

Member must have crossed threshold of 500 points once for being eligible for points redemption.

Redemption on Service Transaction validation

Card validation

- Mandatory swiping of physical MyNEXA card in application to populate card number in designated field.
- Card number gets validated from centralized server for transaction processing.
- In case of invalid card number, system will not allow any transaction & gives an error message.

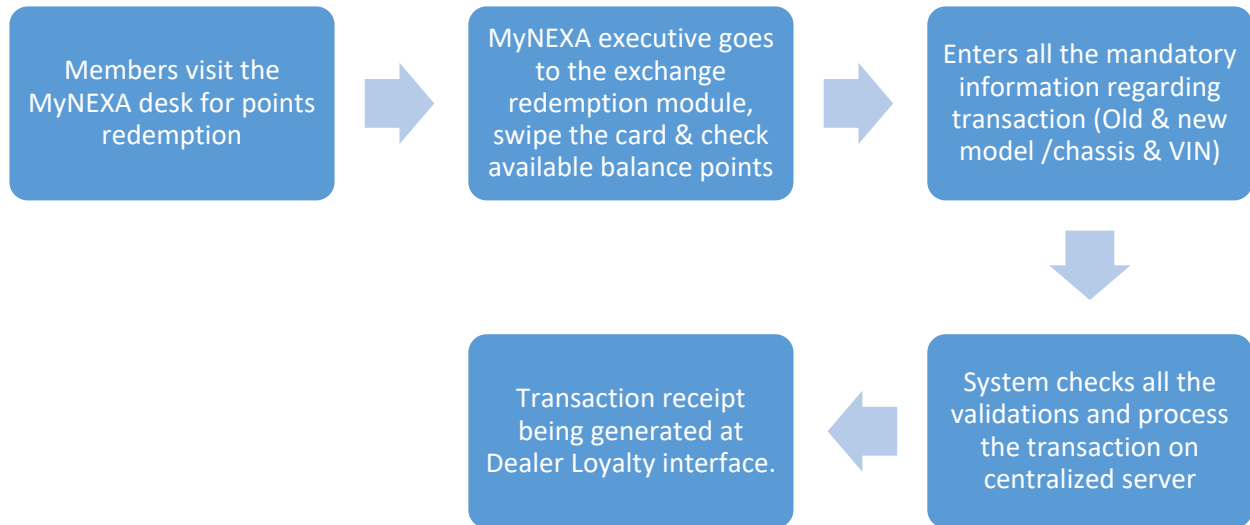

Chassis validation

- MyNEXA executive needs to enter the model & VIN.
- System checks the combination of model & VIN on centralized server. If valid, then system will allow the redemption.
- In case additional VIN is to be added then a formal request has to be sent to program center with proper documentation.

Backend process for Service & other Transactions

- Requests are taken only over Emails
- Requirement
 - Scan copy of Invoice
 - Transaction details in a pre-defined format
 - MSIL approval is required if transaction is validated as per document but not validated by DMS.
 - MSIL or dealer consent is required if backend transaction is requested from customer.
- Backend transaction will be executed only for below cases.
 - If transaction is older than 1 month
 - If software at dealers end is not working.
 - If problem in MyNEXA Card while swapping at dealers end.

Process of Exchange Redemption

Member must have crossed threshold of 500 points once for being eligible for points redemption.

Backend process for Exchange Redemption

- Requests are taken only over Emails
- Requirement
 - Scan copy of new car Invoice
 - Transaction details in a pre-defined format
 - MSIL or dealer consent is required if backend requested from customer.
- Backend transaction will be executed only for below cases.
 - If software at dealers end is not working.
 - If problem in MyNEXA while swapping at dealers end.

Exchange Redemption validation

Card validation

- Mandatory swiping of physical MyNEXA card to populate card number in designated field.
- Card number gets validated from centralized server for transaction processing.
- In case of invalid card number, system will not allow any transaction & gives an error message.

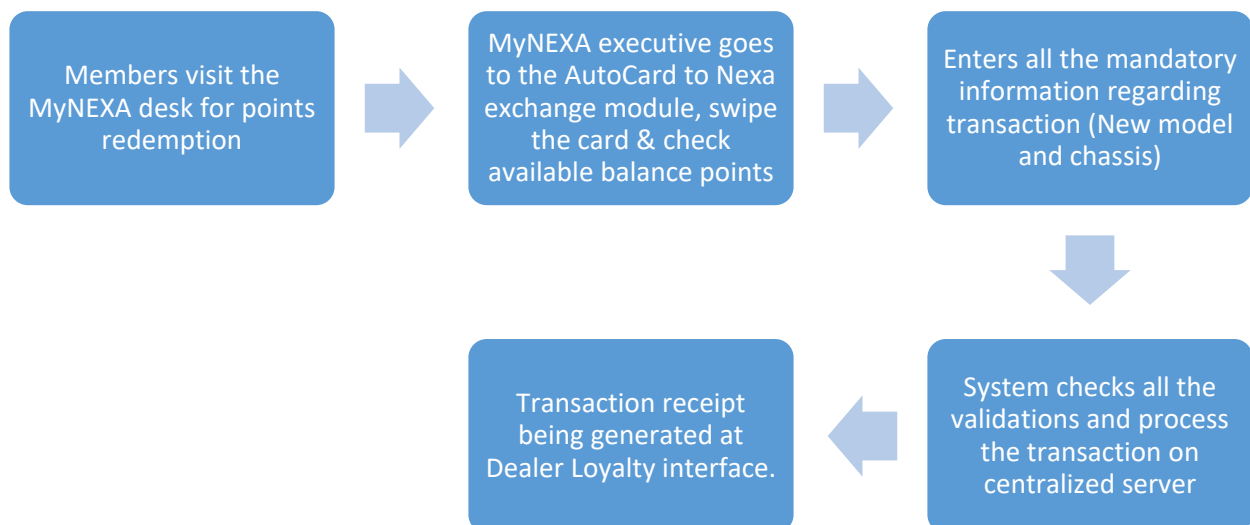

Chassis validation

- MyNEXA executive needs to enter the new & old model & VIN for both the vehicles
- System checks the combination of old model & VIN on centralized server. If valid, then system allows redemption.
- If new chassis no. is already registered in MyNEXA program, system will not allow executing transaction.

Limitations on Transaction count & amount

- Member must have crossed threshold of 500 points once for being eligible for points redemption.
- Card should be activated for at least 1 month
- In case the old chassis is not registered in the card, the dealer has to place a request to the program center along with the documents to get the chassis added to the card.

Process of AutoCard to MyNEXA Exchange

AutoCard to MyNEXA Exchange Redemption validation

Card validation

- Mandatory swiping of physical AutoCard in application to populate card number in designated field.
- Card number gets validated from centralized server for transaction processing.
- In case of invalid card number, system will not allow any transaction & gives an error message.

Chassis validation

- MyNEXA executive needs to enter the old AutoCard model & Chassis no. and new NEXA Model and VIN.
- System checks the combination of old model & chassis on centralized server. If valid, then system will allow the redemption.
- If new VIN is already registered in MyNEXA, system will not allow executing transaction.

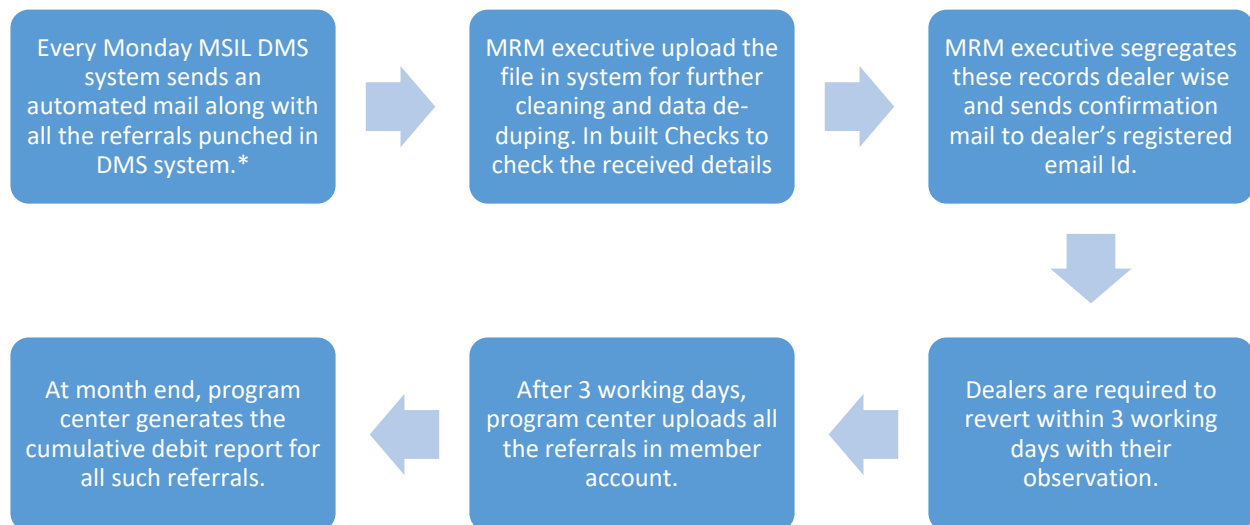

Limitations on Transaction count & amount

- Member needs to have crossed threshold of 300 points once for being eligible for points redemption
- Card should be activated for at least 1 month.
- In case the old chassis is not registered in the card, the dealer has to place a request to the program center along with the documents to get the chassis added to the card.

Referral process

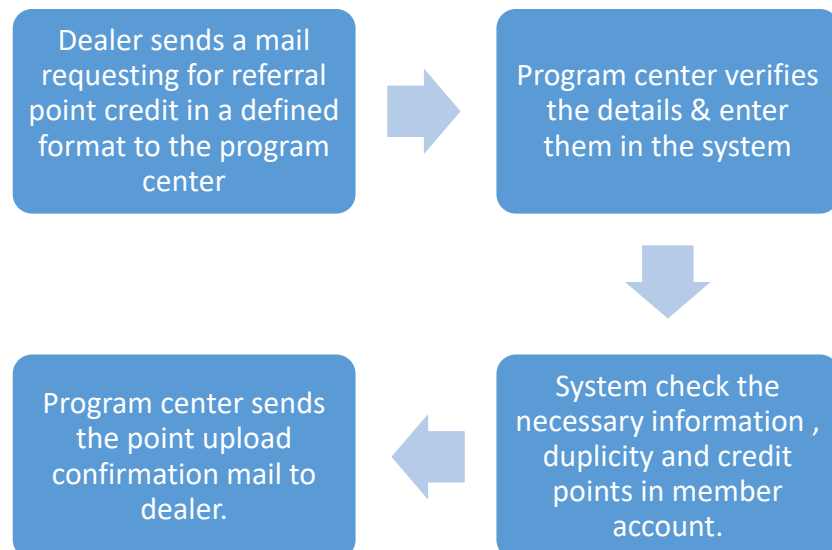

- Referral process is recorded through two mediums
 - DMS File
 - Dealer mail

Process flow for referral received from DMS file

Note: *Ideally file should contain data of last week only.

Referral process through dealer's mail

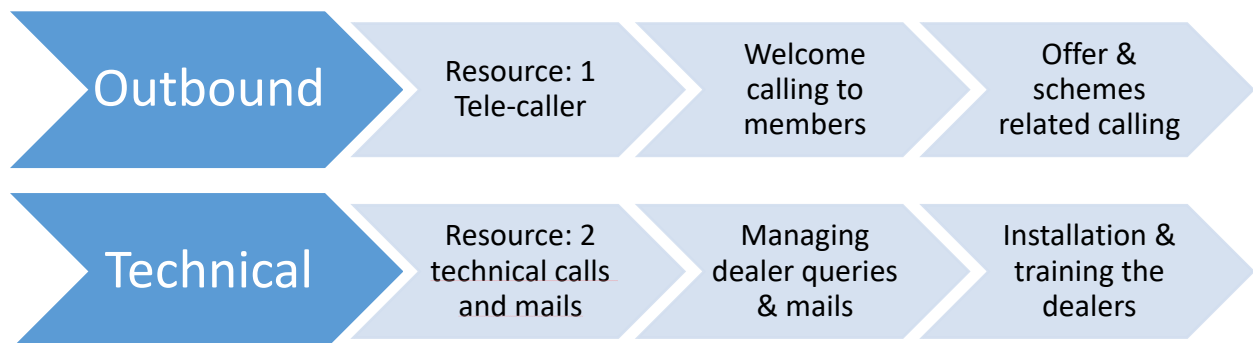

Referral checks & limitations

Backend checks on the referral for file received from DMS as well as Dealer's mail

- System checks for Valid loyalty card number and dealer code. All the records having invalid loyalty card numbers and non-program dealer codes are excluded.
- System checks for duplicate entries on the basis of dealer code, for code, invoice number and invoice date. During this process all the duplicate record are excluded.
- System produces a file having all the valid referral entries which can be credited further.
- Each member account allows only 2 referrals to be added in a month.
- If there is more than 2 referrals for 1 month, then following process is followed:
 - Dealer will send written request to program center & they will take approval from the respective network manger
 - Post approval, program center will credit additional referral in member's account and confirms back to dealer
- *If in DMS files, we receive more than 2 referrals in a month, then system keeps it on hold for that month.
- In case the system receives the hold referral again in next month through DMS and finds it unique then the system considers it as valid and credits the point in member's account.
- If any member have 2 referrals per month consistently for last six months then system will hold any further referrals in the consecutive month.
