Preface

About This Manual

This document provides guidance for agents who process Return Merchandise Authorizations (RMAs) using the Back Office (BO) Portal. It focuses on the Workbench module, where agents receive, verify, inspect, and complete RMAs submitted through various customer-facing portals.

Please note that the menus and modules described in this manual are user specific, therefore you might have fewer or more menus and modules in your system than described here.

Conventions Used in This Manual

In this manual, certain words are represented in different font size, weights and/or within quotation marks. This indicates that they are user interface items such as buttons and messages. Additionally, it uses notes and page screenshots to draw user attention to certain pieces of information.

1.0 Overview

The Back Office portal will facilitate easy administration of master data, system configuration and back-office processes. It will help users manage end to end life cycle of return requests.

Admin users can create, control and manage the master data related to returns. They can define returns process and automate them at a brand and product category level.

Additionally, interactive dashboards provide the real-time and historic insights on KPIs.

1.1 About ReverseLogix

ReverseLogix is a comprehensive returns management system (RMS) that enables companies to streamline return requests, logistics, inventory and processing, connecting every point in the return lifecycle, all through an intuitive and flexible SaaS platform. Discover how you can optimize operations, create loyal customers and continually drive top-line revenue with a scalable solution that connects all the moving parts in the return ecosystem.

1.2 Contact Us

2.0 Getting Started – Interacting with the Portal

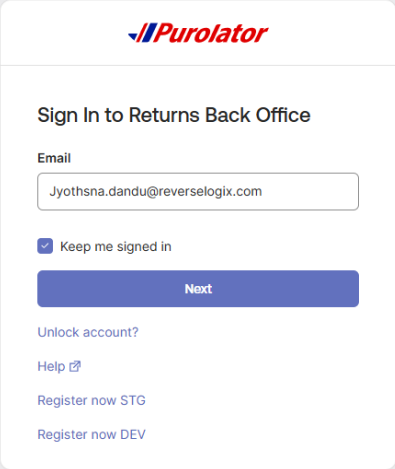

Welcome to the Back Office portal, designed to help you manage the entire lifecycle of your returns. Let's get started with interface of the application and steps to process an RMA.

2.1 Accessing the Application

Open the Returns Back Office Portal [URL](#) in a supported web browser. On the landing page, select Login / Se connecter.

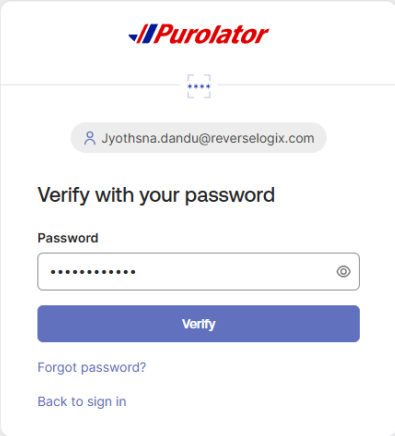

On the sign-in page, enter your registered email address in the Email field. To keep your session active on the current device, select Keep me signed in. Then select Next.

The image shows a web form for signing in to the Returns Back Office. At the top is the Purolator logo. Below it is the title "Sign In to Returns Back Office". There is an "Email" field with the text "Jyothsna.dandu@reverselogix.com" entered. Below the email field is a checkbox labeled "Keep me signed in" which is checked. A blue "Next" button is below the checkbox. At the bottom of the form are four links: "Unlock account?", "Help ?" (with an external link icon), "Register now STG", and "Register now DEV".

If your account is locked, select [Unlock account?](#) and follow the on-screen instructions. On the [Verify with your password](#) page, enter your account password in the Password field. Select [Verify](#) to continue. If you do not remember your password, select [Forgot password?](#) to reset it.

The image shows a web form for verifying with a password. At the top is the Purolator logo. Below it is a user icon and the email "Jyothsna.dandu@reverselogix.com". The title is "Verify with your password". There is a "Password" field with a masked password "....." and a toggle icon. A blue "Verify" button is below the password field. At the bottom of the form are two links: "Forgot password?" and "Back to sign in".

After password verification, the system sends a verification code to your registered email address. On the [Verify with your email](#) page:

- Open the email you received.
- Copy the verification code.
- Enter the code in the Enter Code field.
- Select [Verify](#).

If you do not receive the email, select [Send again](#) to request a new code.

Jyothsna.dandu@reverselogix.com

Verify with your email

 Haven't received an email?
[Send again](#)

We sent an email to j***u@reverselogix.com. Enter the verification code in the text box.

Enter Code

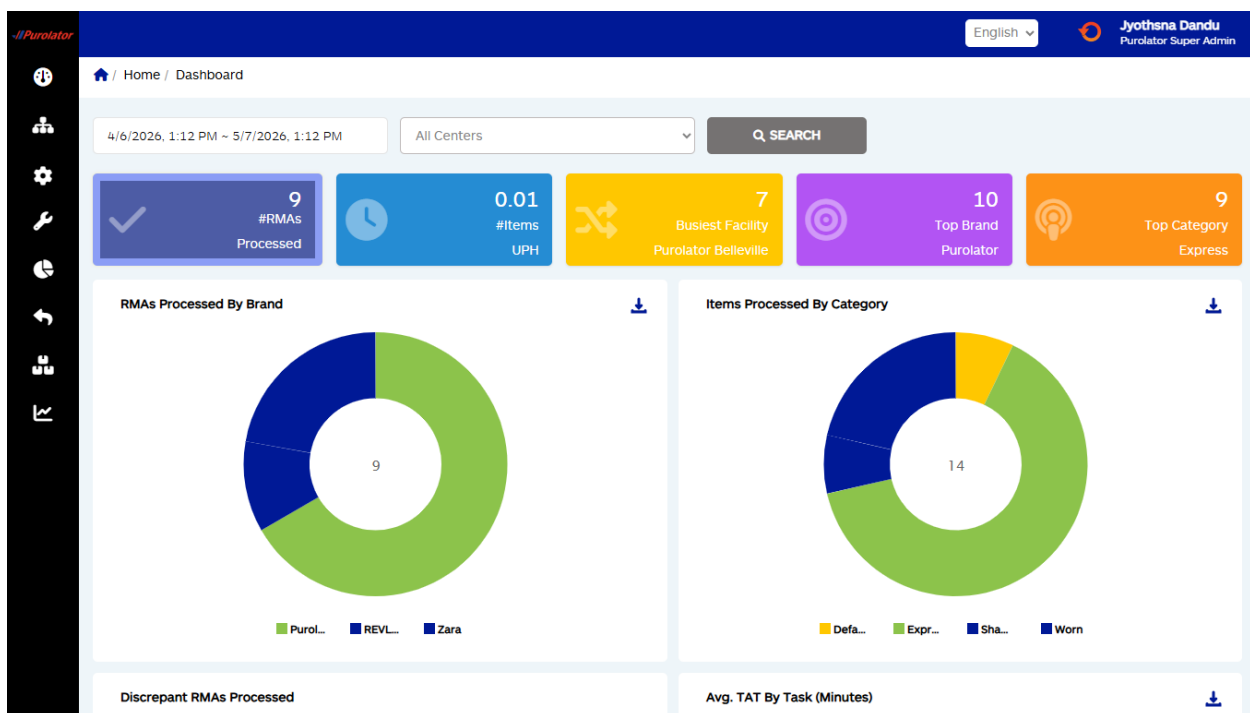

911590

Verify

[Verify with something else](#)

[Back to sign in](#)

After the verification code is accepted, you are signed in to the Returns Back Office Portal. The system opens the Dashboard page.

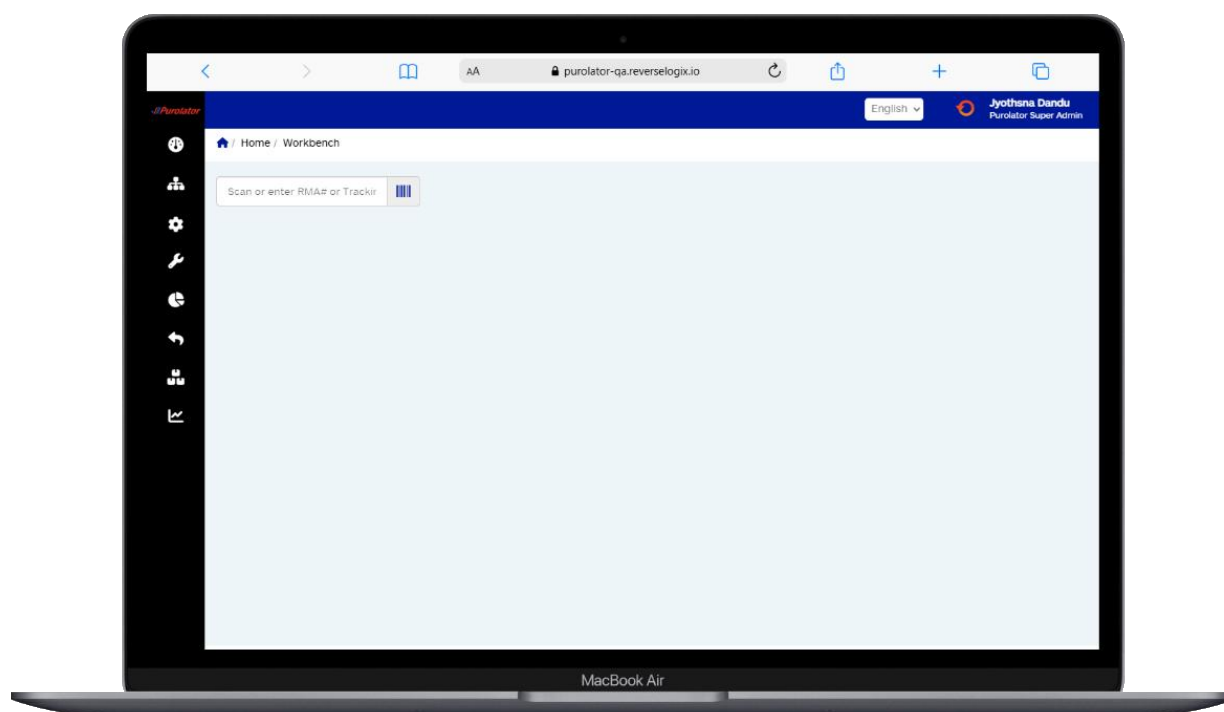

3.0 Workbench

The **Workbench module** is the primary workspace where agents process RMAs. From this module, agents can scan or search for an RMA and move it through the required processing stages until it is closed.

The processing flow an RMA follows in Workbench is **brand-specific** and is determined by workflow rules configured in the **Workflow Configuration** section of the System Configuration module.

To access the Workbench module, click the Workbench button in the left pane. The Workbench module will open.

RMA processing workflows

Each brand can have one or more workflows configured in the system. A workflow defines:

- The processing queues an RMA must pass through
- The order of processing steps
- Any special actions available at specific stages

For reference, common RMA workflows may include:

- Verify → Inspect → Put Away
 - After Put Away, the RMA is closed.
- Verify only
 - After Verify, the RMA is directly closed, with no further queues. These workflows are denoted as Open Verify (OV).

Agents must always follow the workflow assigned to the brand associated with the RMA.

Workflow Configuration dependency

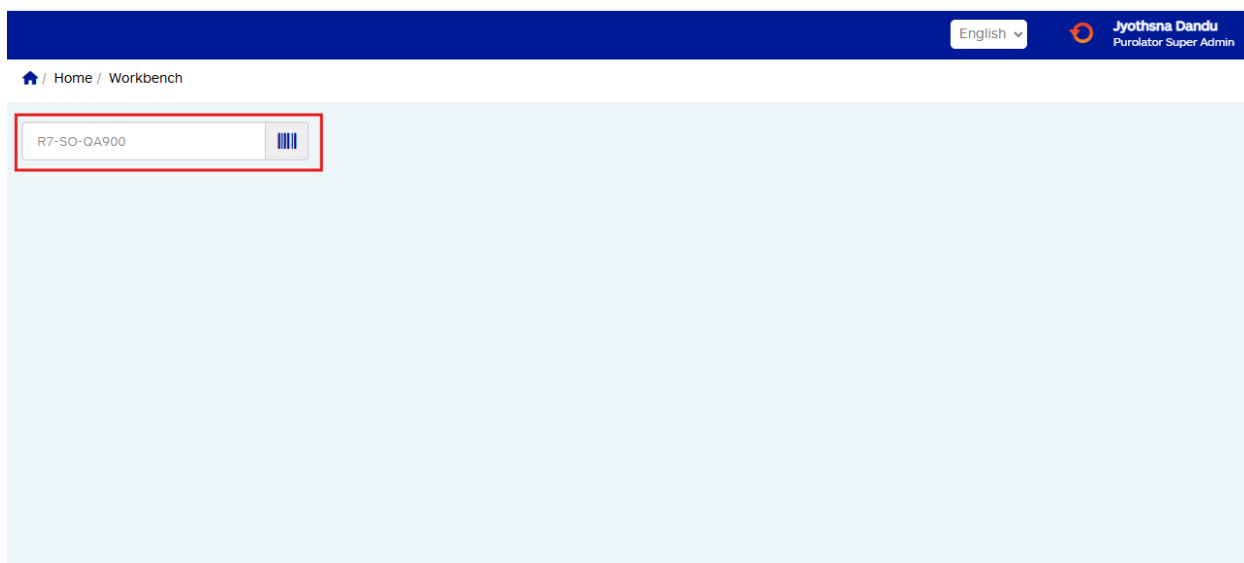

RMA behavior in the Workbench module is driven by settings in Workflow Configuration, including:

- Enabled processing steps (queues)
- Allowed transitions between queues
- Special actions available to agents during processing

Because workflows are configurable, the screens, actions, and processing options visible to an agent may vary by brand.

3.1 Process RMA

On the Workbench page, scan the RMA barcode or manually enter the **RMA number or Tracking number** in the scan field and click Scan icon. 

The system performs validation checks when you attempt to scan or submit an RMA. If a validation fails, the system displays an error message, such as:

- RMA number is missing
- No record found

When the scan is successful, the RMA is marked as Received and the system loads the RMA details on the page. This includes item information and the workflow-specific processing controls configured for the brand.

--Select--

The available controls and actions depend on the workflow assigned to the RMA. For example, in an OV workflow, the RMA may move through only Verify step.

Use the available processing controls to complete the required workflow actions for the current queue. As you complete each step and move the RMA to the next processing queue, the system displays a success message confirming the update.

 Closed 

When all items on the RMA reach Closed status, the Save button becomes enabled.

At this stage, the RMA is ready to be finalized.

Undo and redo processing actions

Until the RMA is saved, you can reverse processing actions if needed.

- Select Undo to roll back all processing actions performed in the current processing queue. This allows you to reprocess the RMA using different values or selections.

The screenshot shows the 'R7-SO-QA900' RMA item in the 'Workbench'. The status is 'Closed' with a green checkmark. The item details for '1. SKUAPI2' are: Brand: Purolator, Color: Black, Size: Large. The 'Item Verify Complete / Vérification Fini' section shows a 'Yes / Oui' selection. A 'SAVE' button is visible in the top right corner.

- After selecting Undo, the Redo button becomes available. Select Redo to reverse the undo action and restore the previously applied processing.

The screenshot shows the same RMA item, but the status is now 'Redo' with a circular arrow icon. The item details for '1. SKUAPI2' are: Brand: Purolator, Color: Black, Size: Large. The 'Item Verify Complete / Vérification Fini' section shows a '--Select--' dropdown menu. A 'SAVE' button is visible in the top right corner.

You can use **Undo** and **Redo** multiple times, as long as the RMA is not saved.

Save and close the RMA

Once the RMA item status is Closed, select Save to finalize processing.

CONDITIONS OF CARRIAGE

IMPORTANT - PLEASE READ: The consignor agrees that the act of tendering the shipment to the carrier for transportation shall be sufficient to constitute signature of this bill of lading by the consignor and shall bind the consignor to the conditions of carriage stated below.

RECEIPT: Carrier acknowledges receiving from the shipper, at the point of origin and on the date specified, the shipment described in this bill of lading in separate good order, except as noted (contents and conditions of contents of shipment unknown), and agrees to carry and deliver the shipment to the receiver at the destination set out in this bill of lading, subject to payment of all lawful charges. "Carrier" refers to Purolator Inc. and any connecting and/or successive carriers involved in the transportation of the shipment herein described, including any of their respective subsidiaries, controlled entities, and their respective employees, agents and independent contractors.

LIMITATION ON LIABILITY: Carrier's liability in respect of the shipment described in this bill of lading (including for any loss, damage, delay, misdelivery, non-delivery or failure to deliver) is limited to \$2.00 per pound (\$4.41 per kilogram) computed on the total weight of the shipment, unless a higher value is declared in the specially marked Purolator Online Shipping user entry field, "Declared Value for Insurance (9)". Notwithstanding any disclosure of the nature or value of the goods carried or any special agreement to the contrary, carrier is not liable under any circumstances for the consequences of delay, or for any indirect or consequential damages (including lost profits) however caused.

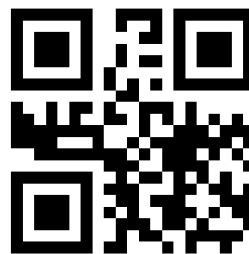

NOTICE OF CLAIM: Carrier is not liable for any loss, damage or delay to any goods carried under this bill of lading unless notice of the claim setting out particulars of the origin, destination and date of shipment of the goods and the estimated amount claimed in respect of such loss, damage or delay is given in writing to the carrier within sixty (60) days after the delivery of the goods, or, in the case of failure to make delivery, within nine (9) months from the date of shipment. Subject to any overriding statutory provisions, the final statement of the claim must be filed within nine (9) months from the date of shipment, together with a copy of the paid freight bill. If the Convention applies, other notice periods may govern. No claim will be entertained until all transportation charges due in connection with this bill of lading have been paid in full. All claims are subject to proof of amount of loss.

TERMS INCORPORATED BY REFERENCE: Every service to be performed under this bill of lading is subject to the conditions of carriage contained in this bill of lading, including the terms and conditions contained in Purolator Inc.'s published terms and conditions of carriage and the terms and conditions prescribed by the law of the jurisdiction where the goods originate (including the uniform conditions of carriage thereunder, if any). If the carriage involves an ultimate destination or a stop in a country other than the country of departure, the Convention (as defined below) may apply and limit the liability of the carrier in respect of loss of, damage to or delay of cargo. "Convention" means the Convention for the Unification of Certain Rules relating to International Carriage by Air, signed at Warsaw, Poland, 12 October, 1929, or the Convention for the Unification of Certain Rules for International Carriage by Air, signed at Montreal, Canada, 28 May, 1999, or those Conventions as amended or supplemented as may be applicable to the carriage hereunder.

MISCELLANEOUS: Unless otherwise indicated, the consignor's name and address is the sender's name and address indicated on this bill of lading, and the latter is the place of execution and the place of departure; the consignee's name and address is the receiver's name and address indicated on this bill of lading, and the latter is the place of destination; and the date indicated on this bill of lading is the date of execution. There are no specific shipping pieces which are agreed to, and the carrier reserves the right to select the mode and the mode of transportation that the carrier deems appropriate. The consignor warrants that the shipment is properly described on this bill of lading and on any accompanying documentation, and that the shipment is properly marked, addressed and packed to ensure safe transportation in accordance with the carrier's ordinary care in handling. Unless otherwise indicated on this bill of lading, the consignor waives its right to determine the volume or dimensions of the shipment, and to indicate same on this bill of lading. The consignor appoints the carrier as its agent for the performance of customs clearance and selecting a customs broker.

ENTIRE AGREEMENT: The terms and conditions contained in this bill of lading, including those incorporated herein by reference, constitute the entire agreement relating to the carriage of the shipment described in this bill of lading, and no agent, servant or representative of the carrier or consignor has the authority to alter, waive or otherwise modify any provision of this agreement. In tendering the shipment described herein for carriage, the consignor agrees to those terms and conditions on his own behalf and on behalf of the consignee and any other party claiming an interest in this shipment.

To view the QR code, select the QR Code button. The system downloads the QR code in your local system, which can be scanned or shared as needed.
